# CASE STUDY

## Sanallah

I am Thankful to Sindh Government for the UCBPRP project under vocational training component of this project I was selected for mobile Repairing training. Now I am confident that efficiencies are persisting in the domain of VTEC Rawalpindi. VTEC Rawalpindi is committed to developing qualitative and skilled workforce through hard working environment within institutions by focusing on demand driven training programs.

### VOCATIONAL TRAINING PROGRAMME- JACOBABAD

**Vocational Training program** is well thought-out as a major tool for reducing unemployment and Poverty for the youth of Rural based community, it has been endeavoring to increase the understanding level to exert a pull on more & more of our poor youth towards Technical Education and professional Training. The Aim of Union Council Based Poverty Reduction Program by Sindh government is to reduce poverty in Rural based communities through UCBPRP project from different capacity building programs in three Districts Shikarpur, Kandhkot and Jacobabad. Vocational Training Program is one of them which are

The Participants Sanaullah with Principal VTEC Rawalpindi and coleague

implementing by NRSP- Institute of Rural management a largest training institute for building and humanizing the capability of rural based deprived and vulnerable youth from employable skills through Technical Education and Vocational Training. NIRM set up VTECs at different locations for employable skills trainings, VTEC Rawalpindi of NIRM is one of them to expose participants interest level to a range of practical activities in the vocational field in order to make them familiar with, and stimulate their interest in, vocational subjects and so give them equal opportunity to chosen their learning environment respectively for careers in either the technical or vocational field.

**This Case study** provides a theme of Vocational and Technical trainings in general description and highlighted some positive achievement of this programme. Many Technical and Vocational trade participants worked to give birth to the idea of this project and to carry it through to completion. The participants **Sanaullah** his Father name is Muhammad Amin is one of them who achieved his goal of life, he acquired a training in Mobile Repairing trade under the supervision of mobile repairing resource person Mr. Adnan from VTEC Rawalpindi in November 2011 he belongs to a poor family keeping poverty score 7. He graciously shared his initial thoughts and hopes for such a project. It is survival mission of government of Sindh which have changed my life now, before training I was used to be a blue collar employee and my earning was not sufficient to bear my household need, then through Union Council based Poverty Reduction program my Community Organization (Sardaran) identify my name for training then NIRM team came in my village and verify my name and assessed me, I have chosen mobile repairing trade because since childhood I had a

lot interested to become skilled at mobile repairing course because in near my village there is small city Bahadurpur where is need of mobile repairing shop. My training started at VTEC Rawalpindi in mobile repairing trade where I found excellent learning environment committed teacher and all other support staff, through this I will gain a lot on the subject of mobile repairing techniques and after one month my training course completed with examination test where I passed and achieved a one month training certificate. So after training a big challenge come out against my career that how will I start the work of mobile repairing without resource then my father fulfilled my needs and borrowed some money from his friend and gave it to me, then I purchased

mobile repairing tool kit and open a shop at bahadurpur and I have also sell easy load there, now I am pleased on my earning which is 600/Day, and Insha Allah very soon I will return those money which my father borrowed from his friend. I will never forget this project in my whole life which have changed my social & economic status in my community and build my career onward and this programme also will encourage the all deprived poor youth those are living below the poverty line.
